

Note:

1. 'RewardsReceiptItemList' have multiple Items, So replace 'RewardsReceiptItemList' with 'barcode' in the Receipts entity and 1 'barcode' only represent 1 item , and extract all Item's features in 'RewardsReceiptItemList' to Item entity.
2. Entity Item' s primary keys are Bran_id and Receipts_id that come from Brand and Receipts entity separately.
- 3.' barcode' in Item and Receipts are combined of 'barcode' and 'userFlaggedBarcode' from 'rewardsReceiptStatus'
